

# RF Coils

**Custom Design and Manufacturing**

**Testing Integration and Test Capabilities**

## Typical Applications

Tuning  
RF Distribution Networks  
RF Matches  
Pulse Forming Networks  
Many more applications!!!

Richardson Electronics can design, fabricate and manufacture many types of RF coils to meet your exact specifications. We maintain strict quality control and repeatability. By utilizing our in-house capabilities, we provide you with faster lead times and competitive pricing.

## The Richardson Advantage

Richardson Electronics has developed a robust, proprietary process of silver plating copper inductors specifically for the low loss transmission of RF Power
