

AC PROPULSION INC
BEIJING EMOTOR ADVANCE

AC PROPULSION PRODUCT OVERVIEW

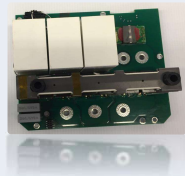

ACP Product	Picture	Functionality	Customer Audience	Remarks
Inverter Module – Cutting-Edge SiC or IGBT Technology		To be incorporated into DC to AC Tri-Phase motor inverters. Reversible for re-gen operation.	Manufacturers of inverters, of PM and IM Tri-Phase motors and of drive systems for EVs, marine applications & machinery.	ACP components are validated for automotive applications only.
Complete Inverter Board – Cutting-Edge SiC or IGBT Technology		Needs housing & heat sink to become a complete inverter. DC to AC Tri-Phase only, reversible for re-gen operation.	Manufacturers of inverters, of PM and IM Tri-Phase motors and of drive systems for EVs, marine applications & machinery.	ACP components are validated for automotive applications only.
Complete Inverter – Cutting-Edge SiC or IGBT Technology		DC to AC Tri-Phase motor inverter. Reversible for re-gen operation.	Manufacturers of inverters, of PM and IM Tri-Phase motors and of drive systems for EVs, marine applications & machinery.	ACP inverters are validated for automotive applications only.

ACP Inverter Electronics Only Fit Battery/DC-Powered Applications.

AC PROPULSION APPLICATION MAP

- Total Applications (Relative Nb.)
- Applications Covered by ACP Electronics Validated (Relative Nb.)
- Applications Covered by ACP Electronics Non-Validated (Relative Nb.)

ACP Inverter Electronics Only Fit Battery/DC-Powered Applications.
