

Your Source for Wolfspeed Compatible Replacement Parts

Richardson Electronics, Ltd. offers a wide range of Navitas Silicon Carbide (SiC) MOSFET modules, engineered for high performance and reliability. These modules feature GeneSiC's patented trench-assisted planar gate technology, combined with Navitas' proprietary epoxy potting for enhanced thermal and mechanical durability. Navitas GeneSiC™ modules can serve as replacement parts for Wolfspeed SiC MOSFET products. Contact us today to learn how Navitas GeneSiC™ modules can power your next innovation.
